ProVerne

Overview

ProVerne's cutting-edge solutions for Flight Operations provide you advanced optimizers for commercial planning with a 'Manage by Exceptions' philosophy deployed in all products ensure that your day of operations are also optimized.

In your complex operations, having the right data, at right time and in the right hands is a must. With multiple data integration layer, our products interact with all other IT systems seamlessly so that the focus remains squarely on business objectives.

Key Functionalities

- Commercial Route Planning
- Manual and Automated Aircraft Assignments
- Aircraft Maintenance Schedules
- Disruption Dashboards for Day of Ops
- Automatic Aircraft Movement Data Handling
- Automatic Generation and Transmission of Schedule and Movement messages
- Manage Fleets, Individual Tails, Operating Airports and more via Settings
- Full suite of Reports with Automated Distribution
- Integrated Analytics and KPI Dashboarding

Notifications

- Configurable email notifications for unhandled exceptions, pending work assignments and more
- Email notifications for data integration with CMS

Flight Operations Management System (FOMS) Modules

FOMS was built from the ground up using many of ProVerne's tools that are currently in production. Here are the key modules that make up FOMS:

- Flight Ops Optimizer
- Integrated Messaging Platform to Support other Tools

Technology and hosting

ProVerne products are offered as Software-As-A-Service and are deployed on Amazon Web Services, allowing us to further guarantee stability and systems security.

And, unlike many SaaS solutions, ProVerne tools are device-agnostic and can be accessed through any standard web or mobile browser, eliminating roll-out/upgrade downtime, supporting Crew "Bring Your Own Device", and having NO requirement for additional software or applications to be installed.

Implementation and Support

ProVerne's unique, rapid-prototyping implementation approach gives you a solution tailored to your organization with an amazing time-to-market. Typically, you'll see your first iteration in two weeks or less and from there we'll work closely with your team to make sure that layouts, dashboards and workflows all are optimized to your unique operation. With ProVerne, there are no surprises, and every engagement is an opportunity to exceed expectations.

ProVerne stands apart from other providers in that we are on a constant mission to ensure that you are receiving maximum value for your investment. Everything, from the application to payments and administration, is designed to reduce overhead and keep you focused on the business.

And once you're live, we continue to support you with customized SLAs based on your airline requirements, as well as a dedicated JIRA portal for reporting and tracking service issues.
